HARDY WATER LILIES

There is nothing more fascinating than Water Lilies in the garden. The smaller the garden the more desirable is the delightful feature of a pool even if it only be a half barrel sunk in the ground.

It will be a spot of daily interest.

The needs of the Water Lilies are the same whether they are grown in a tub sunk in the ground, a con-

crete pool or a natural pond. Full sunshine, rich soil and warm shallow water.

Of course there are all kinds of Water Lilies. Tropical Water Lilies, both day and night blooming, that need special built tanks in greenhouses to keep them alive in the winter.

We, however, confine ourselves exclusively to those kinds that are hardy and that will grow as the wild pond Lilies.

Their colors range through all the reds and pinks, beautiful combinations of yellow, buff, orange and those glorious white ones that look as if they are carved out of wax.

It is most difficult to describe the colors for it is really the changing combinations which add so much to their charm.

From the time the lily pads or leaves come up out of the mud and float on the surface of the pool there is a constant change. Leaf after leaf develops until the plant gets strong enough, then will come a bud, which daily gets larger until it lifts itself well out of the water expanding in the early morning closing about midday, opening again the following morning.

WATER LILIES

ATTRACTION:—A brief description is, garnet with tips of petals shaded a light rose. In rich soil the flowers lift themselves well out of the water and measure 8 inches across ----- \$4.00

EUGENE de LAND:—A vigorous free growing variety. Color a deep rosy pink with yellow center ----- \$1.00

GLADSTONE:—The queen of white Water Lilies. Dazzling white large and strong grower, 6 to 8 inches across ----- \$2.00

HOPATCONG:—An exquisite small white ----- \$1.00

INDIANA:—A vivid combination of shades of copper, and wine color. ----- \$2.50

JAMES BRYDON:—This variety was the general favorite of the many visitors to our Lily Ponds. The color is a rich rosy crimson, beautifully shaped, large flowers and rich foliage ----- \$3.00

ROSE MAGNOLIA:—Most delightful delicate pink, the flowers stand well out of the water and a very free grower ----- \$1.00

*Twenty per cent reduction on single prices
in quantities of ten or more.*

PINK OPAL:—Rich pink, vigorous grower and produces an enormous quantity of flowers. A splendid kind for naturalizing in ponds. ----- \$1.50

ROSE AREY:—Deep cerise pink, very delicate and lovely ----- \$2.00

SIOUX:—The general effect is copper colored but the color constantly changes to all shades of apricot. An exquisite variety ----- \$2.50

NELUMBO NUCIFERA, The Japanese Sacred Lotus:—The large round leaves stand 2 to 3 feet out of the water, the flowers stalks above them. Blooms over a period of two months, the individual flowers lasting 2 to 3 days. The pointed flower buds get larger and larger until they open into a flower that reminds one of a gigantic peony of exquisite rose pink color and form. To grow it to perfection it requires deep rich mud and plenty of room so that if grown in a tub, the tub should be at least 3 feet across and 18 inches deep. ----- \$2.50

NELUMBO LUTEA, The American Lotus:—Very much like the Japanese Lotus, but with large pale, lemon yellow flowers, equally as beautiful as the pink. \$2.50

HARDY PERENNIALS

We are growing a stock of Hardy Perennials and Biennials such as Coreopsis, Foxglove, Larkspurs, Iris, Peonias, Centaureus, Day Lilies, Hardy Lilies, Canterbury Bells, Pansies, etc.

Let us make you up a list for any given place or purpose.

With few exceptions they range in price from 5 cents to 25 cents each.

HOW TO PLANT WATER LILIES

The plant you get is a tuber with one or more growing points. This should be planted or anchored in the mud where the water is not more than 6 or 8 inches deep.

If they are to be grown in a concrete pool plant in boxes or tubs not more than 12 inches deep and sink to the proper depth so that the surface of the soil will not be more than 8 inches under water.
